
Subject: Re: [BUG?] X11 (at least OSX) Menus displayed under TopWindow,
owner=RootWindow

Sorry, just noticed that this way is better:

```
if(activate) {  
    if(!this->IsPopUp())  
        topwindow->SetWndForeground();  
    else  
        focusCtrl->SetWndForeground();  
}  
the previous  
if(activate)  
    topctrl->SetWndForeground();  
causes flickering of the window frame, shadows and titlebar.
```
