
Subject: Re: [BUG?] X11 (at least OSX) Menus displayed under TopWindow,
owner=RootWindow

Sorry, just noticed that this way is better:

```
if(activate) {  
    if(!this->IsPopUp())  
        topwindow->SetWndForeground();  
    else  
        focusCtrl->SetWndForeground();  
}
```

the previous

```
if(activate)
```

```
    topctrl->SetWndForeground();
```

causes flickering of the window frame, shadows and titlebar.
