## Subject: Re: FEAT: Tcl as a plugin
Posted by dolik.rce on Tue, 01 Feb 2011 21:02:43 GMT

Hi,

Did you see the Tcc package in bazaar? It allows to compile a c program in memory (very fast) and run them right away. Also it is possible to call functions from your c++ code, so it can be nicely used instead of scripting.

Of course, if you feel like creating Tcl plugin, you can  Having a more choices is always good...

Best regards,
Honza
