Hi,

quite a long time ago I had to use Tcl at work. The only thing I remember about it is that I deliberately decided to erase every memory of it from my mind .

I am using python at work now and think it is very good. Its license should be OK. The Python web site states:

Quote:The Python implementation is under an open source license that makes it freely usable and distributable, even for commercial use. The Python license is administered by the Python Software Foundation.

Best regards,
Oliver
