
Subject: Re: [BUG?] X11 (at least OSX) Menus displayed under TopWindow,
owner=RootWindow

I've just discovered that this `if(activate && !topctrl->IsPopUp())`

`topwindow->SetWndForeground();`
doesn't solve all popups. E.g in the left bottom file list popup are still opening under the main window... I guess because theide immediately activates file contents in the editor window, so the editor steals the focus? I'll try to investigate deeper.
