Hi,

You're missing `#include <Controls4U/Controls4U.h>` in `TestEditFile.h`

```
//...  
#include <CtrlLib/CtrlLib.h>  
#include <Controls4U/Controls4U.h>  
using namespace Upp;
```

If you use some widget in `*.lay` files then you'll have to get it into the scope (include it's file) before `*.lay` include.

```
// I.e.:  
#include <SomeHeader>
```

```
// SomeWidget will be used in .lay file  
#define LAYOUTFILE <testEditFile/testEditFile.lay>  
#include <CtrlCore/lay.h>
```

Andrei
