Hi,

Trying to write a new application, I get this message :

"Thelde"main.cpp

In file included from /home/joseph/upp/MyApps/gTMXcleaner/main.cpp:1:

/home/joseph/upp/MyApps/gTMXcleaner/gTMXcleaner.h:13: error: expected template-name

/home/joseph/upp/MyApps/gTMXcleaner/gTMXcleaner.h:13: error: expected unqualified-id before

The line 13 is the declaration of the class :

```
#ifndef _gTMXcleaner_gTMXcleaner_h  
#define _gTMXcleaner_gTMXcleaner_h
```

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
#include "Controls4U/Controls4U.h"
```

```
#define LAYOUTFILE <gTMXcleaner/gTMXcleaner.lay>  
#include <CtrlCore/lay.h>
```

```
class gTMXcleaner : public WithgTMXcleanerLayout<TopWindow> {
```

```
public:
```

```
    typedef gTMXcleaner CLASSNAME;
```

```
    gTMXcleaner();
```

```
    void Clean();
```

```
    void Close();
```

```
    void Fichier();
```

```
};
```

```
#endif
```

What is wrong ? Seems that I followed exactly the samples...
