Tom1 wrote on Thu, 17 February 2011 09:00OK, I see:

As of SVN3198 CtrlLib: Moved splitter width to style definition.

Best regards,

Tom

I'm sorry for that I'll restore it today. I thought nobody is using this. My thought was that width of the splitter is a part of skin definition and should be changed only through skin changes not by the control itself.
