Another Idea:
- Name:
 Google V8 JavaScript in U++
- Proposed by:
 Ion Lupascu
- Difficulty:
 Medium
- Experience required:
UPP, V8 JavaScript, JavaScript
- Description:
V8 implements ECMAScript as specified in ECMA-262, 3rd edition, and runs on Windows XP and
Vista, Mac OS X 10.5 (Leopard), and Linux systems that use IA-32 or ARM processors. In U++ V8
will be a good choise to create possibility for extensions.
