Hi all,

All was perfect with U++ until I uploaded the new stable release 3211 for win32. I run the IDE under Vista home premium edition and I compile my projects with MSC9 (SDK Vista). The new error messages I got now are :

```
c:\dvt\upp\uppsrc\painter\BufferPainter.h(270) : error C2143: syntax error : missing '}' before
'constant'

'ImageBuffer'
$blitz.cpp
EatMe: 2 file(s) built in (0:03.90), 1950 msec / file, duration = 6287 msec, parallelization 28%
```

There were errors. (0:10.81)

I reviewed the header file of BufferPainter and found the first error for the compiler is :

```
enum {
    MOVE, LINE, QUADRATIC, CUBIC, DIV, CHAR
};
```

I do not understand at all. I made no other change except uploading the install exe file for 3211-win32 and now none of my projects needing Controls4U/Functions4U and of course painter can be compiled.

Please is anyone has experienced this issue and how to fix it ?

Thanks and regards
