Hello all

No log for the meeting (problems with Slashnet, it is not compatible with Firefox 4). If somebody has it s/he can upload it.

We talked about GSoC. I will include the state of art in the other post, as at the same time of the meeting I was talking with the GSoC Globus admin and gave us good advices.

Other issue we talked is about U++ as a library. .icpp files, INITBLOCKs and things like that.

Finally we could not talk about TheIDE.
