Hello all,

Thanks to Lionel(chickenk) for saving my time by proposing to integrate in U++ ZMQ(ZeroMQ, 0MQ) library.

The first step is ready and can be used.

I have attached the example and simple example with Hello World.

The ZMQ library reads my mind about integrating IPC, TCP communication in one library!

OK, I tested this only on linux OS (Ubuntu 10.10) an later will test on win32 OS.

In the evening I will upload this in the bazaar repository.
