Subject: Re: httpclient : problem with some permanently redirected pages
Posted by mr_ped on Thu, 24 Mar 2011 16:41:43 GMT

I'm really not sure, but aren't redirect URIs supposed to be absolute according to norm?

I'm not saying the code can't handle relative URIs as well, but if it's defined in norm as absolute only, it's partly bug in the web page too, not only code.

Sorry, no time to verify anything of this today.
