silverx wrote on Thu, 24 March 2011 20:59 On the topwindow you can do sizeable and zoomable, and you can change the size and that.

But if I do a layout, how do you make it sizeable and zoomable like you can the topwindow?

I have tried adding that to all kinds of items, and get errors.

Can it be done, and how.

see:

TopWindow& TopWindow::Sizeable(bool b)

TopWindow& TopWindow::Zoomable(bool b = true)
