Thanks, but I think, there are problems with some code in Core like this:

```
static char s_date_format[64] = "%2:02d/%3:02d/%1:4d";
```

```
void SetDateFormat(const char *fmt)
{
    strncpy(s_date_format, fmt, 63);
}
```

```
String Format(Date date) {
    String s;
    if(IsNull(date))
        return String();
    return Format(s_date_format, date.year, date.month, date.day, DayOfWeek(date));
}
```
