Hello typhoong

I think your doubts come from in page http://www.ultimatepp.org/appideinstall$en-us.html it talks about Windows 7.

Do not worry. As that page says, the downloads include:
- Windows 7 Headers and Libs (do not worry about "Vista" here - this options contains Win98/2000/XP headers too).
- x86 C++ Compiler (you might want to install x64 compiler too)
- Windows SDK Utilities for Win32
