further PythonPP development?

My memory is getting back slowly. Besides just bringing PythonPP back to life it requires complete redesign of marshalling code. Old code never looks good.

To be fair, I already promised a lot to many people. Before PythonPP I promised a firebird driver for UPP. I think I will switch to firebird now.

if so, i'd love to have some help in 'exposing' upp to python..via boost then.

Of course, Boost is the best, unless there are political issues related to it. IMHO you shouldn't have any problem using it because it was around for a decade and you should be able to find a lot of examples on internet. This can be an inspirational reading
