You may have a look here:
 http://www.ultimatepp.org/forum/index.php?t=msg&goto=767 2&&srch=openbsd#msg_7672

I got to run TheIDE a long time ago under OpenBSD, but finally, I managed to get it running. I will try to recompile latest version ASAP.

If you intend to write multi-threaded programs, you should check if the shipped compiler (C++ libs) is now supporting thread local storage since U++ library heavily makes use of it.
