john2004 wrote on Sun, 01 May 2011 16:05I see this is an old post, but when I found it, I was so glad someone had written a support document for callbacks. The problem is. I can not open the rar file. Downloaded it six times, tried to open it with 3 different RAR enabled applications and they all said it was unknown format or damaged.

Can anyone post a copy in doc,html, pdf or whatever is available?

Thanks, John

Hello,

I have no longer a copy. This post was on the older server and I am afraid now there is nothing attached.

Perhaps somebody else has a copy although I doubt.

Luigi
