Subject: Creating a TIMESTAMP column in MySQL
Posted by bushman on Sun, 01 May 2011 14:46:54 GMT

Hi, all!

Is there any .sch file macro for CREATEing a column like
'`my_column_id` TIMESTAMP NOT NULL DEFAULT CURRENT_TIMESTAMP'
in a MySQL DB?

Is it what MySqlSchema.h macro TIMESTAMP(ts) does, i.e. creates a column that defaults to
CURRENT_TIMESTAMP?

If so, could anyone give me an example on how to use it?

I've tried
TIME_ (MY_COLUMN_ID) TIMESTAMP("CURRENT_TIMESTAMP"),
it compiled fine, but the resulting CREATE TABLE statement defaults column to NULL.

Thank you all in advance!
