jibe wrote on Tue, 10 May 2011 09:47Hi,

I updated to the last built (3409). I obtain a "synchronize" dialog box, with all files to add/update/delete. Good ! But the problem is that it wants to delete all my apps and tests, even in the MyApps folder

Could you add some check box to choose "(un)select all files to be deleted" ? It could do that globally, or better folder by folder. Globally would be already very usefull : I cannot uncheck manually hundreds of files that I want to keep !

Hi Jibe,

That is weird, it shouldn't touch the stuff in MyApps... I will have a look at it ASAP.

The "select all files" actions are good idea, I'll try to implement it soon.

Best regards,
Honza
