how to pass WString from EditString to Sql and from Sql To EditString

for example (below exmaples are only for demonstration I need how to do this. and again characters are non ascii

```
EditString editstr
 String s = editstr->GetString()

Sql sql
sql * Select(p).From(databse).Where(q = s)

// clearing s string
s.Clear();
while(sql.Fetch())
   s.Append(sql[p]);

editstr->SetString(s);
```
