how to pass WString from EditString to Sql and from Sql To EditString

for example (below exmaples are only for demonstration I need how to do this. and again characters are non ascii

```
EditString editstr
```

```
String s = editstr->GetString()
```

```
Sql sql
```

```
sql * Select(p).From(databse).Where(q = s)
```

```
// clearing s string
```

```
s.Clear();
```

```
while(sql.Fetch())
```

```
    s.Append(sql[p]);
```

```
editstr->SetString(s);
```
