Subject: Re: 605rc2 linux: 'upp' directory not found
Posted by turcio on Mon, 15 May 2006 14:55:07 GMT

I put uppsrc to /usr/bin/local/upp. I didn't have the GCC32.bm file and it still didn't want to work
without it. I took GCC32.bm from earlier binary release, edited a bit and ultimate++ works fine
now.
Thank you for your help
