Garorobe wrote on Tue, 17 May 2011 05:38Hi, %all%!

My situation is that I have to use some libs in my project (it's SDK for industrial cameras - in attachment). Now I would like to make a package containing headers and libs, making project easily distributable.

Click-it-all strategy doesn't help much (that's not a good thing BTW, but nevermind). Tried reading help and some topics around here but still can't get hang of mechanics.

Could you please explain me how do I make package I need?

Hello Artem

Please include a very simple C/C++ console demo and I will return you a JAI folder and a JAI\_Demo folder.
