kohait00 wrote on Tue, 17 May 2011 14:36obviously there is something wrong with your upp installation.

Yes there was a problem and it relates to my post in this thread on April 4
Quote:Perhaps my question would be more appropriate in the "Newbie corner" but how in theIde do you pull something up that is in "bazaar" or "sandbox"?? A few times I just copied from bazaar into MyApps.

I updated several times since then and had moved the Py stuff from bazaar into MyApps.

I just now updated to Upp 3427 and Py/install.txt is in bazaar.
