dolik.rce wrote on Fri, 25 March 2011 23:46... right click in the bottom left area,
Can the bazaar assembly be added to the existing list this way without pulling up a notes.txt file as a reminder this is what is required:

Package nests: C:\upp\bazaar;C:\upp\uppsrc
Assembly name: bazaar

edit: What would be better is have the bazaar assembly on the list by default.
