Subject: Re: I created new package as empty how do I start adding code?
Posted by nlneilson on Fri, 20 May 2011 22:58:24 GMT

I just updated Upp and tried to get bazaar in the assembly list 4 times.
I just get a nice white screen to the right of bazaar.

It's easier to copy the packages, much less frustration.

edit: If examples, reference, tutorial and uppsrc were not in the assembly list there would be more white area in that box also.
