Please, help me with the code below:

.h:

```
class Ma_app : public TopWindow {

public:
 typedef Ma_app CLASSNAME;
 Ma_app();

private:

 GridCtrl grid;
};
```

.cpp:

```
void CreateWidget(One<Ctrl>& ctrl)
{
 ctrl.Create<EditString>();
}

Ma_app::Ma_app()
{

 Zoomable().Sizeable();

 for(int col = 0; col < 10; col++)
  grid.AddColumn(Format("col %d", col)).Ctrls(CreateWidget);

 grid.Add();
 grid.GoBegin();
 for(int col = 0; col < 10; col++)
  grid.SetCtrlValue(col, "a string");

 Add(grid.SizePos());
}

GUI_APP_MAIN
{
 Ma_app().Run();
}
```

I expected GridCtrl Edits to display "a string", but got blank EditStrings instead. What am I doing wrong??

Help appreciated, thanks in advance.
