When I do that I get a compiler error (MSVC 2010):

error C2676: binary '[' : 'S_PUNCH_VIEW' does not define this operator or a conversion to a type acceptable to the predefined operator

If I switch it to `sql[FIRST_NAME]`, I get "Assertion failed in e:\upp\uppsrc\Sql\Sql.cpp, line 287 0" at:

```
Value Sql::operator[](SqlId id) const {
    String s = ~id;
    for(int i = 0; i < cn->info.GetCount(); i++)
        if(cn->info[i].name == s)
            return operator[](i);
    NEVER(); // <-- here
    return Value();
}
```
