silverx wrote on Wed, 01 June 2011 10:17I tried this and added a PromptOK(inl); so I can check what it is reading. Thanks.

When I run it nows gives me an box that has:

ERROR: Invalid UTF-8 sequence: `#
Hi David,
The PromptOK() expects qtf formatted string as argument, please read the page on QTF. To pass a normal string to it, use PromptOK(DeQtf(inl)) to escape the characters that would be interpretted as qtf formating code or PromptOK("\1"+inl), to mark the entire string as non-qtf.
