Hi Koldo

Here is a .zip as of today.  
<http://www.nlneilson.com/apps/GUtiler.zip> ~2MB

This is what it is linked to, FWTools 2.4.7  
<http://home.gdal.org/fwtools/FWTools247.exe> ~22MB  
I have this installed on C:\FWTools2.4.7  
If you all ready have that installed somewhere else just change the build paths.

Thanks for looking at it, I felt I was running into a dead end street.

edit: If it would be of any help for checking the links or whatever I zipped and uploaded the MSVC 10 package.  
<http://www.nlneilson.com/apps/DsTileQtGUI.zip> ~21MB  
That also links to FWTools.
