tojocky wrote on Thu, 02 June 2011 09:47Hello Koldo,

First of all I want to thank you for this great library.

I propose to add new method Value GetText(int col, int row) for Excel wrappers (MS and open).
This method is same as GetValue but it returns the formatted text value.

The modified files are attached.

Hello Ion

Do you mean that in case of a formula, GetValue() returns the formula and GetText() returns the result?
