Well, best info I was able to find:

<http://www.telusplanet.net/public/wuth/linux-windows-strongarm.html#Ref1>

So there is "gnuwince" toolchain, however seems to work in linux only - or in cygwin.

Hm, looks like the first iteration of WinCE U++ will be done in Linux Quite paradox, is not it?

Anyway, somebody to downloang GNUWINCE and test whether it works?

Mirek
