You can set the font for the whole U++ app:

Draw::SetStdFont(Arial(12));

Mirek

I tried it and the sign "1/2" doesn't want to appear. Even with Courier no result. This is for me very strange because up to 604 it appeared normally in the application. Maybe it is normal after your last big upgrade. By the way, it appear in TheIDE.

Luigi

Actually, 605 version does not include "big upgrade". It was meant to be last one without it

Do you think you could create a simple test-package for me?

Mirek
