koldo wrote on Tue, 07 June 2011 06:59Hello Neil

Program compiles well but I get this error:
ERROR 4: Unable to open EPSG support file gcs.csv.
Try setting the GDAL_DATA environment variable to point to the
directory containing EPSG csv files.

:

After playing with .bat files, I tried to force GDAL_DATA to the right folder, but the error always
appear.

This may be your problem with linking.
These may be necessary to run/debug in theIDE

```
Setup->Build methods
PATH C:\FWTools2.4.7\bin
INCLUDE C:\FWTools2.4.7\include
LIB C:\FWTools2.4.7\lib
```

Run options
Program arguments: C:\WINDOWS\system32\cmd.exe /K "C:\FWTools2.4.7\setfw.bat"
Working directory: Where you have placed the .tif file.

Have the args hard coded.

Many of these requirements have been eliminated in the ntile code in the GUI.

If the earlier ntile.exe is placed in FWTools\bin then none of the extra stuff is necessary.
