Subject: How do I use WIndows Message pump timer?
Posted by jeff1101 on Thu, 18 May 2006 02:01:02 GMT

Sorry if this topic should not be here.

I have reused CounterCtrl. How do I write the code to set a timer that will trigger a callback function at the appropriate time ?

I dont want to start a new thread just to do this. I do want the message pump of windows to call the callback function when the timer is set.

Thanks.
