SOLVED (maybe)

By the way!

I move same way and accidentally correct the bug!!!

I kill one row and all become correct!!!

Let's try!!!:

svn: 3546

file: X11Wnd.cpp

comment line: 1025 (function void Ctrl::SetWndForeground0():

void Ctrl::SetWndForeground0()

```
{
    GuiLock __;
    LLOG("SetWndForeground " << Name());
    if(!top || !IsVisible()) return;
    if(!IsEnabled()) {
        LLOG("Not enabled");
        XWindow *w = GetXWindow();
        if(w && w->last_active && w->last_active != this &&
            w->last_active->IsOpen() && w->last_active->IsEnabled())
            w->last_active->SetWndForeground();
    }
    else {
        // SetWndFocus(); // <<<----- Comment this line
        XRaiseWindow(Xdisplay, top->window);
    }
}
```
