SOLVED (maybe)

By the way!

I move same way and accidentally correct the bug!!!

I kill one row and all become correct!!!

Let's try!!!:

svn: 3546

file: X11Wnd.cpp

comment line: 1025 (function void Ctrl::SetWndForeground0():

void Ctrl::SetWndForeground0()

```
{  
  GuiLock __;  
  LLOG("SetWndForeground " << Name());  
  if(!top || !IsVisible()) return;  
  if(!IsEnabled()) {  
    LLOG("Not enabled");  
    XWindow *w = GetXWindow();  
    if(w && w->last_active && w->last_active != this &&  
       w->last_active->IsOpen() && w->last_active->IsEnabled())  
      w->last_active->SetWndForeground();  
  }  
  else {  
    // SetWndFocus(); // <<<----- Comment this line  
    XRaiseWindow(Xdisplay, top->window);  
  }  
}
```
