[View Forum Message](#) <> [Reply to Message](#)

I installed the U++ on ubuntu 10.10 and working fine.

I was trying it to install / run on windows.

Trying to run Button example program from new install.

Win 7 64 bit system.

I get following message for build, But no error message.

Further checking I found there is no out put from preprocessor.

Alt+F7 gives empty window Button.i.tmp

What can be error. Mostly I missed some install step.

I did install / uninstall 3~4 times.

TIA.

Alex
