To follow up on this; is it possible to add a NullImage to the list of one uses the IMAGE_DATA construct.

E.G.

```
// Icon image
IMAGE_DATA(0x12, 0x13, 0x14)
// NullImage to indicate the default image has to be used
IMAGE_DATA()
```

I can't test the above code at the moment. Will try to do it soon.

Best regards,

Martin
