spotted an error in the code!

begnur wrote on Tue, 10 May 2011 17:48 how to pass WString from EditString to Sql and from Sql To EditString

for example (below exmaples are only for demonstration I need how to do this. and again characters are non ascii

```
EditString editstr  
String s = editstr->GetString()
```

```
Sql sql  
sql * Select(p).From(db).Where(q = s)
```

```
// clearing s string  
s.Clear();  
while(sql.Fetch())  
    s.Append(sql[p]);
```

```
editstr->SetString(s);
```

In line

```
sql * Select(p).From(db).Where(q = s)
```

Must be

```
sql * Select(p).From(db).Where(q == s)
```
