Subject: Another RTF import bug -- Tables again
Posted by mdelfede on Fri, 08 Jul 2011 16:04:59 GMT

Here another bug a customer pointed out; tables are wrongly imported, even with latest svn.
I've added 2 images and the rtf file; here the bad behaviour :

Here the correct one (from libreoffice writer import) :

As you can see, the FIRST row is imported correctly; next ones get additional empty columns.
The attached RTF contains (among other...) the table.

Ciao

Max
