Hi,

I come here rarely, i'm busy with my job now.

I send you another library for OfficeAutomation and whatever you want : the "DispHelper"

It demonstrates using COM objects including ADO, CDO, Outlook, Eudora, Excel, Word, Internet Explorer, MSHTML, PocketSoap, Word Perfect, MS Agent, SAPI, MSXML, WIA, dexplorer and WMI

Here is the links

<http://cvs.sourceforge.net/viewcvs.py/disphelper/disphelper/>
sourceforge.net/projects/disphelper/

I use the plugin OfficeAutomation and have this little bug:

The EXCEL.EXE does not close correctly!

Here is a program test and bug report.

I do not know where is the problem.
