Thank for suggestion.

I have found the (complex) solution from IDE code and I have simplified it.
The key to show a splash screen is "Ctrl::ProcessEvent();".

This is the code which works:

GUI_APP_MAIN

```
{  
    HelloWorld hw;//Examples: AnimatedHello  
    hw.PopUp(NULL,false,false,true,true);
```

```
    Ctrl::ProcessEvent();
```

```
    MyAppWindow app;
```

```
    Ctrl::EventLoop(); //to run animation
```

```
    app.Run();  
}
```
