Thanks for the suggestion Koldo and Unodgs..
Header file was missing..Thanks again
I went thru the Help Section.
When i use the function "Add(grid.SizePos());",the GridCtrl gets added to the layout and it works fine..

In the manual they have not discussed about manual addition of GridCtrl to the layout but only using "Add(grid.SizePos());"

But when i manually add the GridCtrl to the layout and use it as similar to ArrayCtrl i get the error saying:

But this doesnt happen while manually using ArrayCtrl on the layout.

Please do correct me if i am wrong..

Best Regards
Monty
