Subject: Little fix for FileSel::AddPlace

Hello,
on my computer (Windows XP SP3) the GetVideoFolder() and GetDownloadFolder() functions return empty String (I don't know why and it doesn't bother me now). I had to change the code for FileSel::AddPlace(...) method to reflect such a situation:

```
FileSel& FileSel::AddPlace(const String& path, const Image& m, const String& name)
{
 if(path.GetCount()) // added
  AddPlaceRaw(NormalizePath(path), m, name);
 return *this;
}
```

Is this fix OK?

Gabi
