Hello all

Sorry for the simple question: I have installed U++ by hand in a new Ubuntu 11.04.

I have added new include folders, but I get an error when linking:

```
/usr/bin/ld: cannot find -lgdk_pixbuf-2.0
```

Linker folders set now are:

- /usr/X11R6/lib

- /usr/lib

What folder should I have to add?
