Add the progress widget to it.

I noticed no working example of the widget progress.

I did manage to get it working. Here is an example of that along with the read that has the fix in it
you suggested.

While it only reads data, and not puts out anything, it does a progress of the read of the file. You
need to have a 20K or larger file probably to see it work.

Feel free to use it as an example, bazzar, or reference, of the widget progress with a cancel
button for people to see.

David Corning
