```
I wanted a 3state Option in a column.
Using
grid.AddColumn("option").Option()
I got a simply two state.
Modifying the library method MakeOption and adding .ThreeState() the problem is resolved
static void MakeOption(One<Ctrl>& ctrl)
{
    ctrl.Create<Option>().ThreeState().ShowLabel(false);
    ctrl->SetData(0);
    ctrl->WantFocus();
}
```

However I would ask to Daniel to consider adding a new method to get the ThreeState when desidered. For example

.Option(bool threestate=false)

Thanks, Luigi

Ok, why not It will be in repository this evening

Thank you!
